

LEETONIA EVSD

Use of Funds: ESSER/ARP ESSER

Funds provided through the Elementary and Secondary School Emergency Relief Fund (ESSER) and the American Rescue Plan (ARP) will be used for the following purposes:

- Purchase of (3) three new busses in order to update bus efficiency and space out students. This will also allow us to have less students on busses through rerouting processes with new busses available, also purchased a new van.
- Updating the building air handler systems to provide better efficiency and cleaner air allowing for proper air flow through the buildings.
- Full time subs will be employed to ensure that all classes are covered when teachers are out due to illness. If subs aren't utilized to cover a teacher's class for the day, they will serve as tutors to students who need additional practice with skills lost from being out of the classroom due to closures related to COVID.
- All buildings and busses will receive weekly high-quality disinfection sprays and cleanings above and beyond the normal cleaning.
- An online academy will be started to allow students and families and online educational option if decided that is the best fit for that family. Some of our families have medical concerns and require online learning to prevent the contraction of communicable diseases such as COVID 19.
- A dedicated online facilitator will be hired to aid online families through the learning process to ensure the best possible outcomes.
- Supplies such as masks, plexiglass dividers, cleaning supplies, and building signage with processes displayed, thermometers, and face scanning temperature devices will be purchased to conduct processes for staff, students, and visitors to enter the buildings.
- Contact tracing.
- Technology updates.
